

# My kitchen

For the third consecutive time!

**nolte**<sup>®</sup>  
KÜCHEN

At Nolte Küchen, you'll find everything you are looking for: *the kitchen for your home.*

✓ Refer to the check-list on the fold-out page:  
The questions on the following pages are arranged by subject matter. Above all, they are initially intended to spark ideas. At the end of this document you will also find a list of potential answers to the questions asked – which the practical fold-out pages let you refer to whenever you wish while you are reading.

### Did you know you can make over 1,000 decisions to get a kitchen planned to suit your personal wishes and needs?

We at Nolte Küchen want to make these decisions easier for you – while giving you a kitchen that meets your personal expectations on every score.  
How does it work? With a detailed profile of what you wish to see and need in your kitchen. A profile that reflects your lifestyle and personal situation in life. To make this as quickly and easy for you,

we have put together a number of key questions on the next few pages that take a close look at all aspects of life in and with your kitchen. As you answer them, you will also quickly realise all of the options we can give you. And creating your kitchen profile is fun too – it really is.

Look forward to a journey through the world of Nolte Küchen!

### Planning with emotion and reason. This is how!

You can answer all of the questions in the order they are in or in any sequence you choose. Sometimes it may help to browse a little and do some reading first before you decide on an answer. Or take a look at the kitchen you already have, and get a better idea of what you really want.  
You'll very soon be rewarded for all of the thought you put in: once your kitchen profile is ready, the recommendations tailored to you

personally are just a step away from your nearest Nolte Küchen retailer.

Take some time and get a pen. Be guided through the questions and simply tick the appropriate answers in the check-list provided on the fold-out page at the back of the book. Your very own personal kitchen profile will come together as you go through the pages.

Just the way that suits you.

Are you not planning to move or make any structural alterations? A bespoke Nolte kitchen with corner solutions and units planned from wall to wall makes optimum use of the space you have.

Are you wanting to remain flexible because you may be planning to move home or extend your kitchen? In this case, a Nolte kitchen in modular design (below) may be more suitable for you.

# Preferably *bespoke* – or rather *modular and extendible*?

The first home of your own? A newly built home for the family? Preparing for relaxed retirement? Every phase and situation in life comes with its particular needs. And offers different perspectives for the future. Nolte kitchens are geared towards this from the outset – which means they always simply remain part of your life.

- 1 What situation are you living in?
- 2 Do you think you are likely to move and take your kitchen with you in the next 5 years?
- 3 Do you want your kitchen to be a place to work or live in?

Use the check-list in the back cover to answer these three questions out of a total of 23.

### Your lifestyle matters.

Whether for a single person, a couple or a family, your Nolte kitchen is matched exactly to suit your personal situation in life. This way, you will always have enough "room to manoeuvre" for yourself and for the ones you love.

## Who do I want to share *my kitchen* with?

More and more, the kitchen is becoming the hub of the home. For everyone sharing your life there. This is why some kitchens need a good measure of flexibility – and others plenty of space to play about with, quite literally. Think about who will be filling your kitchen with life today and in the future. And you can be sure that Nolte Küchen will make everyone feel at home in it.

- 4 How do you live?
- 5 How many persons will be using your kitchen?
- 6 How often do you cook?
- 7 What is your style of cooking?

*Modern*

My personality. My kitchen.

As diverse and individual as people are, so too are the preferences they have when it comes to furnishing their home. This is where their tastes range from urban or timelessly classic look to the lovingly detailed country-style kitchen. Making the kitchen just as individual as the rest of the home.

You will also find further examples of the kitchens in the "Kitchen Ideas" menu on our website at "[www.nolte-kuechen.com](http://www.nolte-kuechen.com)".

*Timeless*

*Country style*

# The right type of style for your kitchen.

There's no disputing taste. But it's a wonderful subject to talk about. And, while doing so, paint an increasingly precise picture of your own personal preferences and ideas. Above all, though, be careful not to be distracted by other people's opinions. Because whatever you like is allowed.

8 Which type of environment and style do you feel at home in?

9 Which words best describe your taste in kitchens?

# The art of leaving things out.

Good planning, all from good advice.

MatrixArt is the handleless kitchen for admirers of good design and graphic style. This is where practical functionality meets modern design in an ideal symbiosis. But given the many different options, planning a kitchen like this is extremely challenging. Depending on what you like and goes best with the kitchen you are planning, for instance, you can choose horizontal or vertical lines for tall units and appliance housings.

Get advice from a specialist kitchen retailer to make looks and functionality reflect your wishes in every detail – and, step by step, discover the many different design options for yourself.

**MATRIXART**  
by nolte KÜCHEN

The handleless Nolte kitchen

Kitchen or a place to live in? Why not simply both: MatrixArt's handleless design gives the kitchen a graphic, sleek look.

Great effect: Nolte Küchen provides the option of adding LED lighting to the horizontal and vertical handle trims on base units.

**MATRIXART900**  
by nolte KÜCHEN

The handleless Nolte kitchen in 900 mm carcass height

## Design meets storage space.

Offering a maximum amount of storage space, the designer carcass is also available as a handleless option with MatrixArt 900. The very shallow plinth in conjunction with the 900 mm carcass height and the integrated finger pulls not only provide an ideal working height and a huge amount of storage space but also create a totally new kitchen look.

*relaxed*

The open shelf units integrated into the wall unit not only relaxes the look of the kitchen – it creates a sense of homeliness and provides scope for individuality. The open shelf base unit with drawers in a wood look offers plenty of storage space and gives the kitchen island a light, homely feel.

The black wire grid look gives a hint of what's inside the cabinet but doesn't give too much away.

Uninterrupted tall units with open shelf units and display cabinets with black aluminium frames create an especially harmonic balance. Featuring display units with black aluminium frames, the kitchen almost takes on the appearance of a living room!

## Room to develop your very own personal style.

There are many elements that let you influence the look of your Nolte kitchen. Open shelf units, for example, help to create an overall picture that tends to provide detail and contrast. Closed display units and large surfaces produce a linear, calm look. Simply combine everything to suit your taste – and you'll then always find your very own personal style. Be inspired! And you can be sure: whichever elements and combinations you favour, you can look forward to a high-quality and extremely practical Nolte kitchen.

10

Which style-defining elements do you see in your kitchen?

*sleek*

The open wall shelf units with practical sliding doors create a harmonious liaison with the living area. FLAIR's understated accent edging in volcanic oak, featured in various areas of the kitchen, conjures a picture of visual cohesion.

## Opening up to your kitchen ideas.

Clean lines are always right on trend. And the graphite colour finish is timelessly modern too. As ever, though, it's always a matter of what you make of it – and of whether the material also does everything you would like it to. The PLUS front, for example, is a low-maintenance laminate surface with anti-fingerprint finish. Combined with open wall shelf units, backsplash and shelves in graphite silver oak, you can create a homely ambience that looks balanced and inviting. With your Nolte kitchen you can be sure you're given all the options. Be inspired – and simply follow the clean-cut lines of your own taste.

The CUBE open shelf system opens up a wealth of options for you. How about giving a relaxed look to the end of your kitchen island, for example – or attractive open shelf wall units with practical sliding doors?

Open shelf units and display cabinets with integrated lighting down the sides open up the otherwise somewhat understated kitchen and artistically set the scene wherever it appears.

The illuminated MatrixArt handle trim creates a special ambience and underscores the kitchen's lines with tasteful and stunning effect. The integrated wall-unit lighting conjures a warm and inviting ambience too!

The right worktop illumination is absolutely essential for the kitchen, but creating individually tailored lighting moods is becoming increasingly important too. Our product line-up features a huge choice in this department.

## Lighting is *mood and atmosphere.*

Light is much more than illumination. Because individually tailored to your kitchen, the lighting concept creates atmosphere, adds statements and plays a key part in defining the feel of the room and your personal well-being – all at the press of a button. Modern LED technology provides pleasantly gentle and versatile lighting you can always match to your personal mood and time of day, by remote control or mobile-phone app. This way, you can easily make more of lighting – and let lighting make more of your kitchen.

# Quality for the kitchen that goes with you!

No matter what your budget is and which materials you choose:  
The look and practicality of your Nolte kitchen is never short of perfect.

May sound like a challenge, but gives you immense luxury: with every decision, you can determine exactly how you want to divide your budget. Because Nolte kitchens provide you with countless options to make the statements you want to. That not only goes for look but also for cabinet interiors – as you can see from pages 38-39 on PremiumLINE drawers. Simply invest more in things that are important to you – and choose standard solutions elsewhere. The result will always be a high-quality kitchen from one and the same mould.

Stone 263 – Concrete

Portland 405 – Cement anthracite

Noticeably high-quality surfaces – always.

Genuine or reproduction – that’s the question here. Admittedly, both are hard to tell apart because, first and foremost, all of the materials used in a Nolte kitchen are marked by a feel of particular quality. The genuine materials, such as wood, metal, lacquer or cement are the perfect choice for kitchen lovers with exacting expectations.

There are also high-quality reproductions for many natural products. These absolutely authentic surfaces are in no way inferior to the original and surprise the senses with perfectly imitated texture and colouring. They also meet the wish for individuality and something special in a way that is second to none. Now all you have to do is decide ...

11 Which materials / surface finishes do you prefer?

12 What do you want to spend on your new kitchen?

### Wooden surface:

LEGNO,  
TAVOLA

Genuine wood for exceptional kitchens

ARTWOOD

In no way inferior to the original

### Cement surface:

PORTLAND

Our front with genuine cement surface

STONE, LUCCA

Realistic cement / concrete look with a surprisingly genuine feel

### Metal surface:

FERRO

Our new real metal front is even magnetic

METAL

An authentic interpretation of the metal theme

### Lacquered surface:

SOFT LACK,  
NOVA LACK

Genuine lacquer ranges in matt and gloss

FEEL,  
LUX

Lacquered laminate as an impressive alternative

11 m<sup>2</sup>

Attractive and intelligent room layout with a kitchen island as the centre – open and communicative.

10 m<sup>2</sup>

Nolte Küchen opens up new perspectives for you: perfect work flows from a U-shape kitchen layout with generous work surfaces.

# Plenty of space *to enjoy life – individually tailored.*

Small kitchens or kitchenettes are turned into something special too.

12 m<sup>2</sup>

Optimum use of space.

No matter whether you have a small or large amount of space – with Nolte Küchen you will always find the right solution: from a simple row of units to L and U shapes or a large eat-in kitchen.

With Nolte Küchen you can create spacious eat-in kitchens that extend an invitation to live in.

32,5 m<sup>2</sup>

# With precision *planning* ...

### The Nolte Küchen tip:

A detailed floor plan is the basis for planning your kitchen. It should also show the exact positions of doors, windows, connections, power sockets, radiators etc. It is also important to document all structural specifics and requirements.

If you wish, you can also start planning your kitchen online:

[www.nolte-kuechen.com/en/kitchen-planner](http://www.nolte-kuechen.com/en/kitchen-planner)

# ... to intelligent *realisation*.

From small rented flat to loft apartment, there's a place for Nolte kitchens everywhere. And all of them make optimum use of the space that's available. But often, the various dimensions and parameters seem to establish clear facts. And at first sight permit little variation. In this case, you are in for a few surprises from your kitchen planner. Because there's no limit to good and creative planning.

- 13 How much space you have for your kitchen?
- 14 Which particular structural aspects need to be considered in the room?
- 15 Are you looking for an open or enclosed kitchen?
- 16 Which kitchen shape do you prefer?

# For optimum workflows!

## The Nolte Küchen work triangle

Work paths need to be planned well so that people don't get in each other's way in the kitchen. The three zones used for refrigerating/storing food, cooking and dishwashing should not be much more than two arm lengths apart – and still provide enough space for several cooks. Important utensils are best kept near the hob, food close to the area in which it is prepared.

# Optimal use of storage space!

## Logically planned with clever details.

Think about where you want to do the things you'll be doing in your kitchen. This way you can structure the various function zones and coordinate everything. It's the details that make all the difference: for instance, have you thought about keeping fresh food near the sink and waste bin? This will let you dispose of peelings and scraps quickly and efficiently while preparing food.

To start planning your kitchen straight away, use our web planner on [www.nolte-kuechen.com](http://www.nolte-kuechen.com)

Better view, less disorder: the interior lighting perfectly presents everything inside the spacious drawers and pull-outs.

Room for ideas: extra deep work-tops provide plenty of space for everything you need for cooking.

The last word in convenience from a raised dishwasher – because everyday jobs should be easy to do.

The right interior organisation for your drawers and pull-outs makes sure that no space is wasted – and lets you keep everything you want to in your base units.

The pull-out larder unit (pharmacy unit) provides a huge amount of storage space. And everything is instantly to hand – from both sides.

My need for storage space

## +32% MORE STORAGE SPACE

Opening our extra deep pull-outs produces a real 'wow' effect: the 75 cm planning depth gives you an impressive 32% more storage space – with only 15 cm more space needed at the wall. And they give you considerably more usable space on the worktop in the bargain!

## The *storage wizards* in your Nolte kitchen.

Perfect use is made of corners too – with the “LeMans” corner base unit, for example.

Plenty of storage space: in the pull-out larder unit (pharmacy unit), everything can be reached from both sides.

In a Nolte kitchen, every inch provides space for your life. Because there's never enough storage space. But there are intelligent solutions that make optimum use of the space that's available in your kitchen. Simply think about all the things to need to store – and how you want to get to them. And your kitchen planner will team up with us and provide the perfect storage space concept.

17 How do you normally do your shopping?

18 Is any additional storage space available?

19 Which kitchen appliances do you need to keep on the worktop or store in a cupboard?

My need for storage space

Matrix 900 – this carcass height provides *additional* storage space.

Nolte Küchen leaves nothing out.

Even the 750 mm carcass height with 150 mm plinth (left) gives you a huge amount of storage space in your Nolte kitchen. And Matrix 900 with a carcass height of 900 mm (right) opens up new dimensions for storing dishes and utensils. Because you can never have enough storage space.

Providing a carcass height of 900 mm, Matrix 900 gives modern kitchens a whole new look – based on the exclusive Nolte Matrix 150 grid size.

**MATRIX 900**  
by nolte KÜCHEN

**+20%** MORE STORAGE SPACE

With a carcass height of 900 mm, Matrix 900 provides an incredible 20% more storage space than the standard 750 mm height. This makes even better use of every corner and you always have everything at your fingertips. You can find out more about the Nolte Küchen grid size on pages 36 and 37.

# The individual is the measure.

Anyone spending a lot of time in the kitchen needs pleasant conditions to work in. This is where it is always a matter of striking the perfect balance between design and practicality. Because we never look at one without considering the other when we plan your Nolte kitchen, you can always be sure: the measure of all things is you. A good feeling that's noticed in every job you do.

20 How tall are the persons who regularly use the kitchen?

21 Which appliances need to be integrated in a way that makes them ergonomic to use?

22 Would you like different working heights for the cooking / dishwashing / food preparation zones?

23 Do deeper worktops need to be included for more space on the work surface?

Fitted appliances at an ergonomic work height save your back.

## 150 formula – ergonomic perfection.

Nolte kitchens let you match working height to how tall you are. While standing, the most comfortable working height is when the distance between worktop and bent elbow is approx. 150 mm. Various plinths make it possible to provide an ergonomic working height for persons of any stature.

Thanks to Matrix 150, you can match the working heights in Nolte kitchen to suit the various work zones – e.g. 750 mm for preparing food and 600 mm for cooking.

Customised working height with plinth depths from 50 - 300 mm

# Exactly what *I'm looking for!*

The following collection and product guide clearly lists all details and options for the various elements you wish to include in your Nolte kitchen. This is where your Nolte kitchen adviser will also be pleased to assist you in person.

# Perfect for *living in the kitchen* – Nolte's units of measure.

## Carefully balanced lines – easy to configure!

Simple, logical and clearly structured: Matrix 150 gives you a grid system that is only available from us. It is based on a very simple and easy-to-follow dimensioning logic in which all widths, heights and, in some cases, even depths can be divided by 150 mm. And the wall-unit depth of 350 mm also provides the perfect place to keep pasta plates.

## Planning versatility for you!

To meet any personal wish in any room situation, Nolte Küchen has:

- ▶ 5 base unit heights
- ▶ 8 wall unit heights
- ▶ 6 tall unit heights
- ▶ 4 base unit depths
- ▶ 2 wall unit depths
- ▶ 3 worktop thicknesses
- ▶ variable plinth heights

## MATRIX 900

Carcase height 900

## Geared to practice – with almost identical working height!

Whether 750mm or 900mm carcass height, the combination of variable plinth and carcass makes working height virtually identical.

## Unique, perfectly fitted electrical appliances.

In Nolte kitchens, the grid system makes it easy to integrate all oven brands in the standard 600 mm size for a perfect look – without any filler panels to spoil the overall impression.

## PremiumLINE – the drawer system in *a class of its own.*

PremiumLINE

PremiumLINE Box

PremiumLINE Glass

Perfect in function and design on the inside too.

The Nolte Küchen PremiumLINE drawer and pull-out system impresses right across the board: the designer-style drawer side profile in stainless steel look harmonises perfectly with the drawer base in quartz grey. With PremiumLINE Box, the high-quality basic configuration gives you even more storage space thanks to the closed side profiles. The range-topping PremiumLINE Glas option combines more space with the best possible view of everything inside through the glass side panel – even in a width of up to 120 cm.

More light –  
better view!

Interior lighting can be used  
to show off drawers and  
pull-outs with stunning effect  
– and provide an even better  
view of contents.

# MATRIX900

by **notte** KÜCHEN

The 900 mm carcass height provides the perfect combination of ergonomics and design. With the slim-line plinth, it not only creates a completely new look but also sets new standards in storage space and ergonomics. This makes it possible to plan interesting kitchen configurations, particularly in combination with 600 mm height base unit elements.

The fastest way to perfect organisation in the kitchen.  
Download details now:  
[https://download.nolte-kuechen.de/Innenorganisation\\_GB](https://download.nolte-kuechen.de/Innenorganisation_GB)

# Organisation is a (*kitchen*) job half done.

Making the other half a real pleasure. In a Nolte kitchen at least – because it provides perfect solutions to organising the interior of drawers and pull-outs: various systems are available, ranging from plastic and modular organisational units to genuine ash wood in black.

Plastic

Genuine oak

Genuine ash wood, black

The interior drawers and pull-outs behind the large front panels can be perfectly organised as well.

Individually tailored drawer organisation always provides perfect storage for kitchen utensils of any kind.

The drawings show 2100 mm carcass height.

## Planning information!

To give you an overall picture of the extensive range you can choose from, we have summarised the available carcass heights here in one illustration which shows only a selection of appliance housings.

The example on the left shows you how units vary in relation to carcass height:

Appliance housings always adapt to the appliances fitted in them. Depending on make and appliance height, the units shown here can be varied in terms of front layout and number of drawers or pull-outs.

By way of example, an appliance housing for a refrigerator in 2100 mm height with recess heights of 880, 1025 and 1225 mm (from left to right).

## My fronts

*The choice is yours!*

Do you like a homely, elegant look or prefer it classic? Whichever – Nolte Küchen gives you all the options: individual taste and personal style are not a question of budget. From melamine resin to genuine lacquer, from plain colours to stone and wood decors, the sky's the limit.

This shows you a summary of the materials used for the fronts.

### Lacquered laminate

An extremely calm looking surface and optimum durability are characteristic of lacquered laminate. The fronts are made of an engineered wood panel with a lining lacquered in the course of the production process. High gloss or soft matt, just as you please.

### Mat laminate

A high-quality, soft mat and extremely hard-wearing laminate surface with anti-fingerprint properties.

### Genuine lacquer

High-gloss genuine lacquer fronts are lacquered in several coats and then polished to produce a sealed and particularly smooth surface. Besides high-gloss fronts, fronts are also available with a soft matt genuine lacquer finish. The latter captivates with its interesting feel.

### Genuine glass

Genuine glass fronts – luxurious and homely. Coated with adhesive throughout, a back-lacquered pane of toughened safety glass is bonded to the high-quality substrate material. The extremely hard-wearing glass front gives the kitchen a modern transparency and feeling of space.

### Genuine wood

As an authentic and genuine natural product, wood conveys warmth and a sense of security. The natural variations in colour and texture visible in the grain are an inherent part of wood. Used in the kitchen, the natural material lends itself to quality craftsmanship while conveying its charm and character.

### Genuine metal

The real metal fronts give your kitchen an authenticity that oozes with character: a mixture of metal particles, resins and colour are applied to a base panel made of engineered wood and sealed with clear lacquer. The result additionally impresses with a magnetic effect.

### Genuine cement

The unusual feel of this surface is produced by creating irregular depressions in a panel made of engineered wood. It is then hand-coated with cement, silica and coloured lacquer and afterwards additionally sealed with clear varnish. Robust beauty for combinations particularly rich in contrast.

# A picture of harmony – in any combination.

Nothing is as individual as colours and shapes – and nothing reflects personal taste more. This is precisely where the Nolte Küchen matt lacquer concept comes into play: in a warm and a cool colour set, 19 colours have been developed which, as colour pairs, can be combined and in virtually every case create a look of perfect harmony. You, too, can find your favourite colour, and make a statement in your kitchen. You have the choice of four door designs: from a simple panel door to a classic framed door and an option in new classic or country-kitchen style.

## My carcass decors

What impresses you at first sight will continue to excite you in everyday use: harmony and perfection carried through on the inside.

## Perfect inside and out.

No matter which of our kitchens you choose: it is only perfect when it also meets the highest quality standards on the inside too. This is why the carcasses of every kitchen we make come with the same finish on the inside as they do on the outside to ensure an overall look of consistency – not only for wood hues but for all plain colours too.

### Closed is closed.

With Nolte Küchen, you can take this quite literally: doors with edge seals close so perfectly that hardly any dust gets inside the cabinet.

**AEN** Natural bough oak

**CED** Chalet oak

**ED9** Volcanic oak

**NBR** Walnut royal

**ARW** Arctic white

**PGD** Platinum grey

**QGD** Quartz grey

**GTD** Graphite

**PWD** Premium white

**AWD** Magnolia

**SHD** Sahara

**BET** Concrete

**PWG** Gloss premium white

**AWG** Gloss magnolia

**SHG** Gloss sahara

On request, we can supply matching visible sides for most front decors for which no matching carcass is available. In this case, all carcass sides visible from the outside are finished in matching design. These fronts are marked on pages 56-63.

End panels give your kitchen a special frame. Your kitchen adviser will be pleased to help you in matters of design and planning.

Wood decors

## Natural *charm* – Worktops in wood effect.

Anyone preferring a warm and homely environment in the kitchen sooner or later realises there is no way past a worktop in wood effect. There are numerous options in thicknesses of 25, and 40 mm. Choose from a wide range of decors to suit your taste, and all of course in a high-quality finish to meet your exacting expectations on design.

= Worktops in 25 mm thickness  
 = Worktops in 40 mm thickness

## Cool *elegance* – Worktops in plain colour and in stone effect.

Once the quality is right, it's a matter of design. For our worktops, this means: the choice is entirely yours. Clear plain colours lend the kitchen elegance, with a realistic stone look giving the entire room structure.

Plain and stone decors

= Worktops in 25 mm thickness  
 = Worktops in 40 mm thickness

## Slim-line, delicate and *tough*.

These worktops come with the right attributes for the kitchen: elegance, a light and airy feel and, with some of them, extreme durability.

The reason: selected materials that not only show their strengths to the full in terms of appearance. Like the solid-core material which is familiar from wall cladding where it has demonstrated its qualities, even when a storm brews.

### Fibre board

 = Worktops in 12 mm thickness

## *Flush-fit* installation for sinks, hobs and power sockets.

Flush-fit sinks and hobs combine modern looks with easy maintenance – crumb-free, long-lasting and easy to clean. At last an end to irritating edges – nothing gets caught here, and your worktop is always clean and hygienic.

Whether sinks in stainless steel or granite, whether 40 or 25 mm worktop thickness: every decor is at your disposal! You can even choose any PRO decor for 12 mm worktops. Plus we have perfected the installation – so you can be sure that even after many years' use, there will be no impairment.

- PERFECTLY PLANNED FOR ALL THE THINGS YOU NEED EVERY DAY:
- 1 WASHING MACHINE & TUMBLE DRYER
  - 2 LAUNDRY
  - 3 BOTTLES AND CRATES
  - 4 HOUSEHOLD EQUIPMENT
  - 5 CLOTHING
  - 6 SORTING WASTE
  - 7 PROVISIONS AND STORAGE

## EVERYTHING STORED *next to the kitchen.*

When planning and furnishing your utility room, there are two main questions to address: What do I need – and where do I need it? The answers are then quickly found using our versatile solutions. Functionality, ergonomics and storage capacity are intelligently combined in a way that makes all areas a well-balanced unit. Because this simply makes everything so much easier – whether doing the washing, ironing, putting away the shopping, getting changed after work, collecting deposit bottles and waste glass or whatever else you need to get done in your household. This is where the possibilities are as individual and flexible as your wishes.

The fastest way to an intelligently planned and logically furnished utility room. Download details now.

## Nolte LIVING – *more* than kitchens.

Increasingly, the kitchen is opening up on living space, boundaries are merging, an open-plan eat-in kitchen as the focal point of the home is now right on trend. This makes it all the more important to design the crossover in the same colours and decors as you use in the kitchen. Now, nothing could be easier with Nolte LIVING. And best of all: Matrix150 leaves all furniture in exactly the same dimensions as you choose for the kitchen. Instantly conjuring a picture of lovely harmony, all on its own.

We always work with utmost precision. For optimum results, fully automatic, computer-controlled machines are used for processing all fronts, worktops, cabinets and other elements. The surfaces and edges are finished in this way too. The final touches that are then added by our highly qualified staff produce a level of precision that goes far beyond conventional hand-crafted quality.

## Quality made in Germany.

We accept no compromising when it comes to quality. Stringent testing provides the basis for ensuring that your kitchen will continue to be safe and reliable even after many years of use. This is also guaranteed by the GS label for tested safety that comes with Nolte kitchens. More important for you, though, is the high level of quality you experience every day in your Nolte kitchen, quality that is noticed in all the many details and features.

## Firmly integrated in Nolte kitchens: Responsibility and ecology.

Conserving natural resources, keeping air and water clean and promoting sustainability. These are the three pillars of responsible and sound ecological practice that have been firmly anchored at Nolte Küchen for many years. In production, for example, state-of-the-art filter systems allow us to produce kitchens without involving pollution. All packagings too are made of environmentally friendly and recyclable materials. In terms of pollutant emissions, the materials we use fall well short of the requirements defined in law – providing exactly what it takes to make the home a healthy place to live in.

Official inspection certificates and test labels also confirm our devoted commitment to the environment in all key domains – this is something that makes us particularly proud.

## Deciding with a thought for the environment.

By opting for a Nolte kitchen, you will take ecological responsibility. You will actively help to protect our climate and environment. This is our contribution: we at Nolte Küchen hold PEFC™ certification and are also one of the first in our industry to receive the FSC® label.

# From the very beginning, *all exactly to plan.*

A picture of a kitchen – with a focus on every detail.

Before you start planning in detail, you should define the fundamental structural set-up, such as room size and layout. Important also are the exact positions of windows, doors, power sockets and connections. Once you have carefully measured everything up, make a scale drawing of your kitchen's floor plan on the adjacent planning sheet – as the basis for successfully planning a Nolte kitchen tailored exactly to meet your expectations and needs.

## Nolte kitchen planner on the web:

Online, you will find lots more information on how to plan your kitchen. Click by click, you will be guided through every step of the planning process – leaving you with the best possible result! Try it out for yourself:

[www.nolte-kuechen.com/en/kitchen-planner](http://www.nolte-kuechen.com/en/kitchen-planner)

## Start measuring up!

This page with „squared paper“ gives you basis for drawing you floor plan and for entering the details asked in question 14. Simply get a pen and start planning now!

### Your personal Nolte Küchen check-list for talks with your kitchen planner:

**1** What situation are you living in?  
 owner-occupied     rented  
 alteration     new build  
 Can you or are you planning to make structural changes?  
 If so, which ones? \_\_\_\_\_

**2** Do you think you are likely to move and take your kitchen with you in the next 5 years?  
 yes     no  
 Make sure you give your kitchen a modular design!

**3** Do you want your kitchen to be a place to work or live in?  
 only for cooking     for cooking and dining  
 as the hub of the home

**4** How do you live?  
 single person     couple     family     shared accommodation

**5** How many persons will be using your kitchen?  
 1-2 persons     3-4 persons     5 or more persons

**6** How often do you cook?  
 every day     several times a week  
 only at weekends     rarely

**7** What is your style of cooking? Usually:  
 quick, easy meals  
 dishes involving a lot of work  
 both

**8** Which type of environment and style do you feel at home in?  
 modern     timeless     country style

**9** Which words best describe your taste in kitchens?  
 This information will help the planner to give you the style of kitchen you want:  
 homely     practical     high-quality  
 convenient     impressive     minimalist  
 versatile     structured     customized  
 practical     tidy     inviting  
 spacious     colourful     simple  
 classy     country-style  
 Further details: \_\_\_\_\_

**10** Which style-defining elements do you see in your kitchen?  
 kitchen with handles     handleless  
 planning a sleek look     planning a relaxed look  
 open shelf units     cooking island  
 display units     counter solution

**11** Which materials / surface finishes do you prefer?  
 Surface finish:  
 matt surfaces     shining surfaces  
 Finish:  
 plain     wood (decors)     stone (decors)  
 Material:  
 lacquered laminate     genuine lacquer     genuine metal  
 Artwood (wood laminate)     genuine wood     genuine glass  
 stone decor (imitation cement)     genuine cement  
 mat laminate

**12** What do you want to spend on your new kitchen?  
 My kitchen budget: \_\_\_\_\_

**13** How much space you have for your kitchen?  
 up to 8 sq.m.     8-15 sq.m     16-25 sq.m     over 25 sq.m.

**14** Which particular structural aspects need to be considered in the room? Please make a note of this on the left-hand side of your sketch:  
 room dimensions     angles (if not 90°)  
 door sizes     left or right-hung  
 Where do these doors lead to? \_\_\_\_\_  
 window sizes     sill height  
 position of radiators     water connection  
 drain     cooker connection  
 power sockets for lighting     midway section power sockets  
 other power sockets (refrigerator / extractor hood)

 Built-in spotlights  
 Recessed light fittings  
 Illuminated recess panelling

Would you like multimedia links in your kitchen?  
 Power sockets / USB integrated in the worktop  
 Bluetooth / Wi-Fi sound system

The kitchen is the room of rooms.  
We probably *live* more,  
and more *intensively*,  
here than anywhere else in the home.  
It is the place where  
we meet, where we encounter others.  
As family or friends.  
As a couple.  
We *cook, eat* and *enjoy* ourselves  
in the kitchen. And sometimes we have  
all the time in the world as we do so.  
We argue. And *make up again*.  
We read, write, send emails, post messages.  
And maybe philosophise a little.  
And – quite secretly – the kitchen sets  
the rhythm of our day.  
Good morning. Then midday. Then evening.  
And sometimes night ...  
Which is *why we love* the kitchen.

Living in the kitchen. nolte
